Dr. Marc C. DuPéré Plastic Surgeon

By Debbie Brown

Some believe that the French have always possessed a certain savoir-faire when it comes to design and how they regard themselves. Just as couture fashion houses made international names for themselves in the past, so too today have Parisian plastic surgeons, whose precision work has attained the same levels of refinement and excellence.

Dr. Marc DuPéré brings that same commitment and skill to his own successful practice here in Canada. Having just recently returned from Paris where he studied with the foremost experts in the fields of facial rejuvenation and breast aviation, Dr. DuPéré brings that European finesse and flare to Toronto with the opening of VISAGE, a clinic dedicated to the aesthetics of cosmetic plastic surgery. Located at 170 John Street in the heart of the fashion district, VISAGE has a warm, loft-style ambience that caters to a dynamic, trendier clientele along with the downtown urban professional.

Dr. DuPéré treats patients in the most careful and reassuring manner possible. As he explains: "The interaction I have with my patients is a professional but friendly and welcoming one. My staff was hired with the same idea in mind. I wanted a warm and dynamic team around me... and patients feel very comfortable here."

The clinic's ambience is all the more inviting with the placement of expressive and interesting photographs and artwork throughout. An avid photographer and artist, many fine examples of Dr. DuPéré's own work adorn the walls of this chic clinic. Dr. DuPéré also regularly conducts a series of seminars on a wide range of topics relevant to his practice: advanced skin care treatments, laser hair removal, Botox, lip fillers, eye treatments, cosmetic dentistry, in addition to surgical procedures such as nose and breast surgery, Facelift, liposuction and tummy-tuck.

A graduate of McGill University and the University of Toronto, Dr. DuPéré has presented at various

conferences around the world. It was awarded in 2001 the high distinction at the annual meeting of the Canadian Society of Plastic Surgeons the EM. Woolhouse Clin Research Award for his work plastic surgery.

In this growing field where meets medical science meets Dr. DuPéré notes that the definition of what constitutes beauty is very philosophical by nature. In the way that the Greek understood it, has to do with proportion, symmetry and structure. When considering the face preparation for cosmetic enhance I employ that same approach entire body shape, height and is studied, along with the individual desire, personality and expect lifetime for the previously fountain of youth. It's now as your first visit to VISAGE.
