MY VISIT AT THE VISAGE COSMETIC PLASTIC SURGERY CLINIC

As a makeup junkie, it's easy for me to find ways to achieve the look of a flawless face but other times, it can be hard to fall in love with my natural skin.

I was recently introduced to the luxury [Visage Plastic Surgery Clinic](#) and stopped by for a facial that would make me more confident in my bare skin.

Booking and Consulting Process

I had the [Brise du Nord facial treatment](#) by Skin Specialist and Beauty-Based Nutrition Expert, Angelica Escudero. She has over 12 years of experience in science and art of the skin. With a strong background in nutrition and vegan cooking, she took her passion of healthy living and created a beautiful facial to cater to all her clients.

To get a spot in her chair I called the clinic and I was booked for a session within a week and a half. I was really pleased with the availability and follow up reminder.

On the day of my arrival I was greeted by Dr. Marc DuPéré's team who were so genuinely kind. Additionally, I was happy to learn there was a complimentary valet parking service because we all know Toronto can be a pain to find parking!

The Facial

Before beginning my facial, she assessed my skin. It was then that I learned my skin needed more SPF, less foundation, less abrasive facial tools and more enriched serums!

Having an oily skin type that is highly black head prone, I just wanted the impurities in my skin to be drawn out. After expressing my current concerns and my lifestyle to her, Angelica customized the facial to best cater to my complexion's needs. As she whipped up her magic together, she mentioned she would use multiple types of active ingredients on my skin.

"The Yves Saint Laurent of your skincare should be your serums" - Angelica Escudero

As she continued with my facial, she made specific suggestions of products from [the innovative and clinical line, Forlle'd](#). This hollywood-esque skin treatment costs approximately \$245 for a 1 hour and 15 minute session.

Overall, the treatment was calming and not painful. My session with Angelica was highly informative and effective because many of my blackheads were gone. In addition to me being able to say goodbye to my blackheads, my skin appeared a lot more even. I always love seeing an instant gratification and three weeks after the treatment, I'm still seeing the results Angelica achieved for my skin.

Loving the skin you're in is something everyone should experience and after my morning with the Visage clinic, I hope to experience this more often going forward.

If you're looking for Hollywood radiant looking skin or want to learn more about what the [Visage Cosmetic Plastic Surgery Clinic](#) offers, visit Dr. Marc DuPéré and his remarkable team at one of his two locations in Richmond Hill or downtown Toronto.
